

Who are we?

Smart Software is a computer application development company, focused on the development of school administration software since 1984. Our aim is to provide school administrators the ability to effectively manage their respective institutions. A complete IT solution is on offer through our experienced support network.

Why do schools choose Smart Software?

With an impressive selection of administrative features, our application allows effortless integration of all the modules. The system keeps records synchronised throughout, saving time, duplication of work and reduces inaccuracies.

With our dynamic approach, innovative technology filters through to our client base, ensuring growth and up to date administration.

How will Smart Software make a difference?

The snowball effect that the implementation of our system will have can only be described as "miraculous". After installation and training, the transformation schools experience, normally follow the following trend:

- ✓ Training of administrators...
- ✓ learner and parent info is captured...
- ✓ timetables are issued to learners and staff...
- ✓ teachers and learners meet more regularly...
- ✓ pupils are better exposed to subject matter...
- ✓ academical activities follow an organized pattern...
- ✓ learner performance improve as a result...
- ✓ parents experience this positive attitude...
- ✓ parents become more involved...
- ✓ school experiences increased feedback...
- ✓ the community benefits, the school is the winner!

Feature	Advantage
